

# Everyone has Glimpses of Genius in Them

It's just that our societies and educational systems haven't been geared to generating that. But today, all that is changing. There are new schools popping up everywhere to celebrate a new vision of learning and to recognize the brilliance of our children. Inspiring the natural genius of a teen is far more powerful than correcting mistakes to fit the standards set by regulating bodies. Never measure or compare anyone by pass or fail.

Celebrate the natural talents and passionate achievements of every single person.

Empowerment works. Criticism fails. Learn to see

the potential in everyone and everything that happens. Always look deeper for what's waiting to emerge.

Acknowledging brilliance in all its many forms creates the space for people to become it. Tell everyone that they're brilliant, amazing, unique and extraordinary. The more they hear it, the more they become it and are able to live it as a natural function of everyday life. Students need positive words of encouragement to learn to speak

positive words to themselves creating powerful results.

It's time to train students how to marry their inner passions with the greater potential that's just waiting to come through. It is less about old forms of intelligence and more about how you uniquely connect your inner glimpses to the vast pool of greatness that surrounds us. To awaken students to their unique brilliance and contribu-

tion, to make the difference they are here to make, TPA guides students to see the amazing beings they are and the potential they have to make a huge contribution

to the world as opposed to seeing themselves as small people with problems to solve. Be willing to see teens as more than they currently think they are, so they become it. Guide teens toward consciously contributing their magnificence to the evolution of leadership, coaching, vision, power and everything they're passionate about for the world.

The Turning Point Academy (TPA), located in Sugar Land, Texas is a 6-12 grade school that celebrates this new

TPA students learn to capitalize on the power within to be able to live their dreams and lead others to do the same.
